

CoQ10

100% Natural

Stabilized & Highly Absorbable

200 mg

Product Summary

The majority of the clinical uses for CoQ10 are founded upon its role as an antioxidant, and its role in mitochondrial bioenergetics. It is a coenzyme for numerous reactions involved in cellular respiration, and is required for the efficient formation of adenosine triphosphate (ATP), the cellular currency which drives the majority of enzymatic reactions. As an antioxidant, CoQ10 is the only lipid-soluble antioxidant synthesized endogenously. It inhibits peroxidation of cell membrane lipids as well as circulating lipoproteins. CoQ10 supports cardiac tissues by improving endothelial function and by having a direct anti-atherogenic effect, which results in lower blood pressure and improved ventricular contractility.

In clinical trials, CoQ10 has shown benefit for a wide range of cardiovascular conditions, including congestive heart failure, hypertension, and prevention of myocardial infarction. It also had clinical benefits for a number of neurological conditions, including Huntington's disease, migraine, and Parkinson's disease. Oral CoQ10 has also had positive results in patients with periodontal disease, gingivitis, male infertility, and statin-induced myopathy.

Unique Features

- Identical to the form produced by the human body for high bioavailability
- Improves many varied health conditions, including cardiovascular disease, cellular decomposition and oxidative stress
- Higher dosage of 200 mg keeps pace with the research
- Free of contamination by undesirable residue or micro-organisms, including bacteria or yeast
- In a base of natural ricebran oil and vitamin E to ensure a stabilized and highly-absorbable form of CoQ10

CoQ10
100% Natural
200 mg
30, 60 softgels
Codes: 9310, 9311

Actual size: 15.65 mm X 7.96 mm
Feature: Highly absorbable

Supplement Facts

Serving Size 1 Softgel

	Amount Per Serving	% Daily Value
Coenzyme Q10 (Ubiquinone)	200 mg	**

** Daily Value not established.

Other ingredients: Rice bran oil, softgel capsule (gelatin, glycerin, purified water, carob), natural vitamin E.

Contains no artificial preservatives, colors or sweeteners and no corn, dairy, starch or wheat. Sealed for your protection. Do not use if seal is broken. For freshness, store in a cool, dry place.

Suggested Usage: 1 softgel per day or as directed by a health care professional.

Contraindication: While no specific contraindication exists or is predicted, data is lacking for use during pregnancy, lactation, and in children, the dosage may need to be reduced for those less than 18.

Drug Interactions: Although very little evidence supports this interaction, CoQ10 resembles vitamin K structurally, and a potential interaction is possible for those taking the anticoagulant Coumadin. Close monitoring of the INR is recommended with CoQ10 introduction in these patients.

No other negative drug interactions are known for CoQ10, though a number of medications are thought to interfere with CoQ10 synthesis or function in the body, including statin medications, tricyclic antidepressants, and oral hypoglycemic agents.

· GUARANTEED ·

Bioclinic Naturals products are guaranteed to meet or exceed Good Manufacturing Practices (GMP) of the Canadian Government and the Therapeutic Goods Administration (TGA) regulations of Australia—among the world's highest standards for natural products.
